Summary

Software developer with 5+ years of experience building scalable web applications and leading technical teams. Expertise in full-stack development, microservices architecture, and DevOps. Committed to delivering effective solutions and mentoring team members.

Experience

CyberLogitec, Senior Full Stack Developer   May 2024 – present
                                                                                                                1 year 10 months
- Build IAM and shared features, services for a large logistics project.
- Contribute to application architecture and database design with a focus on scalability and maintainability
- Perform code reviews and provide constructive feedback to improve overall code quality
- Stay up to date with modern technologies and actively introduce improvements into the codebase

SOINMEDIA, Developer, Teach Lead   Jan 2022 – May 2024
                                                                                                                2 years 5 months
- Design and develop blockchain and Web3 solutions, including smart contracts and decentralized applications.
- Manage product features including planning, categorization, priority evaluation, and backlog management
- Work directly with customers, UX designers, and frontend leads to build optimal products
- Plan tasks, lead development team, and assign responsibilities to team members
- Manage and develop company infrastructure and CI/CD systems

ADFLEX, Developer   Nov 2019 – Jan 2022
                                                                                                                2 years 3 months
- Build and maintain products supporting affiliate and marketing platforms.
- Collaborate with business teams to gather requirements, identify improvement areas, and define feature specifications
- Operate, manage, and improve internal systems for enhanced performance
- Develop new features and websites for both internal and external customers
- Create comprehensive system guides to help users become familiar with products
- Build technical documentation to assist new developers in understanding system architecture
- Engineer RESTful APIs and integrate third-party services to streamline data interoperability across internal platforms

Skills

Web Applications, Mobile Applications, Blockchain, Web Scraping, Microservices

GraphQL, Protobuf, Kafka, Orkes

MongoDB, MySQL, PostgreSQL, SQLite, Redis, ActiveMQ, BullMQ

CI/CD, Linux, Docker, kubernetes

Google Cloud, AWS

Node.js, JavaScript, TypeScript, React, Next.js, Nest.js, Golang, Flutter, Lua, Solidity, Rust

Agile, Scrum, Jira
